

# OAK STREET BRIDGE

## Stakeholder Workshop Results

Hospital Access	Improve Regional North-South Traffic	Optimize Use for Residents	Look Good and Last Long	Unobstructed Emergency Access Route	Improve Local Traffic	Safe Pedestrian Crossing	Improve Sight Lines
Hospital access	Needs to provide north-south travel	Optimize Use for Residents	Aesthetic needs lighting	Alternating railroad bypass "stuck" gates	Reduce congestion on Chicago and Oak	Safe crossing for pedestrian crossing/children to parks	Improve sight lines - approach too steep
	Connect Ogden to points south		Historic design	Emergency access to both sides when the gates are down	Better manage bridge traffic	Pedestrian crossing	Vertical slope transition
	Reduce traffic on York/Garfield to town		Improve/maintain aesthetics (in materials and design)	Designed to accommodate weight of all emergency vehicles		Safe pedestrian (children) crossing	
			Improve appearance	Emergency access to hospital		Pedestrian and bike access to park	
			Marquis structure	More than a single lane		Safe means of travel (pedestrian, vehicle)	
			Highest point in town (honor this)	Emergency vehicle crossing		Pedestrian crossing	
			Low maintenance structure				
			Serve as a visible gateway into village
